

Manufacturing leader in custom EPS and GPS resins

Delivering polymer expertise and technical support to molder, empowering our customers to capitalize on high-value applications

Who We Are

Founded in 2008, NexKemia Petrochemicals Inc. has emerged as a distinguished provider of customized expandable polystyrene resins (EPS). Our commitment to excellence is encapsulated in our corporate strategy, which centers around delivering unparalleled polymer and technical support to molders. This strategic approach empowers our customers to strategically position themselves and engage in high-value-added applications.

At NexKemia, we set ourselves apart through the implementation of exceptional production and application engineering methodologies. Our innovative techniques not only facilitate the integration of EPS formulations but also showcase our dedication to cultivating technical expertise. We pride ourselves on fostering collaborative relationships with our diverse customer base, emphasizing a shared journey toward development and success.

Why Choose Us

Innovation

We pursue new creative ideas that support and inspire the EPS industry.

Customer Focus

We place a high value on the satisfaction and long-term relationship with our customers.

Sustainability

We practice environmental, social and economic responsibility to foster a better future

Our Products

NexKem (White EPS)

M-series (Modified grades)

- UL certified, Greenguard

R-series (Regular grades)

- FDA compliant, Greenguard

NexTherm (Grey GPS)

MT-series (Modified grades)

- UL certified, Greenguard

RT-series (Regular grades)

- UL certified, Greenguard

NexKem Eco (White EPS)

ME-series E30 (Modified grades)

- 30% recycled content

RE-series E30 (Regular grades)

- 30% recycled content

NexTherm Eco (Grey GPS)

MT-series E30 (Modified grades)

- 30% recycled content

RT-series E30 (Regular grades)

- 30% recycled content
