

Sustainable products for the future of your business

NexKemia Sustainability Solutions

NexKemia continues to invest in innovation and technology as part of its commitment to developing programs, practices, and products that significantly reduce the amount of EPS waste in landfills. Over the last four years, more than \$30 million has been dedicated to expanding NexKemia's capacity for polystyrene recycling. As part of its circular economy vision, NexKemia acquired Eco-Captation in 2022, a leader in polystyrene waste collection and recycling in Quebec. Building a circular economy is integral to NexKemia's business model. In early 2024, NexKemia launched NexEco, its brand of EPS and GPS resins, containing 30% mechanically recycled content.

NexEco Benefits

- Significantly lowers Greenhouse Gas (GHG) emissions
- EPS & GPS containing 30% recycled content
- Produced using 100% renewable energy
- Ideal choice for Green Building & packaging products
- Significantly reduces waste stream impact
- Qualifies for LEED credits in several categories
- 1 ton of NexEco saves up to 3000 ft³ of landfill space
- Along with EPS & GPS, NexEco is 100% Recyclable

Building a Greener Future

NexKemia's mission is to provide its customers with solutions that will meet the sustainability initiatives of the marketplace. Partnering with NexKemia to recycle EPS & GPS aligns businesses with sustainable practices and environmental stewardship. This collaboration not only supports the circular economy but also meets the growing market demand for sustainability and illustrates the EPS industry's commitment to innovation and a greener future.
